

From 2,000 years before the PYRAMIDS were ever built, right up until a generation ago, we milled our grain on a stone QUERN, then mixed it with spring water and a pinch of sea salt to create the staple of life, our daily bread.

Up until around the 1870s we allowed nature to do its work – trusting in the natural FERMENTATION process that occurs when the almost supernatural array of wild yeasts, bacteria and ENZYMES take over the dough and transform it.

These magical particles consume the proteins and gluten in the grain, liberating minerals and adding B vitamins. This process is known as SOURDOUGH – the first-ever grain-growers mastered it 10,000 years ago in Jordan and Turkey.

The SOURDOUGH process is SLOW and unpredictable. It's (endearingly) moody and capricious, depending on the temperature, humidity, air pressure and myriad different characteristics and variables of the grain itself. But, it makes the dough far more NUTRITIOUS, more flavourful and more digestible. Infinitely so. It consumes the excess gluten that so many of us are intolerant to, and transforms it into pockets of carbon dioxide gas which then get fossilised as glorious BUBBLES within the bread/dough.

We love this natural FERMENTATION process so much that we use it to create all our PIZZAS – made with purely organic flour.

And our devotion to natural processes extends across our menu, from the veggies to sauces, TEPACHE, craft beers and naturally FERMENTED wines.

## START

Marinated Olives 6

Sourdough Flatbread 5

add Bagna Cauda (anchovy) +5

fermented chili honey butter +6

## SHARE

Pickled Cucumber Salad - tahini, salsa macha, spicy (contains peanuts) (v) 15
